

Join Us October 28, 2008 from 10:00 - 11:00AM
in the Academic Senate Chambers, Titan Shops
For an overview of Earthquakes and Emergency Preparedness at CSUF

This seminar will provide a brief overview of seismic hazards in southern California. The discussion will be:

- **What you might experience in an earthquake**
- **What damages might occur to buildings in California**
- **How to protect yourself before, during, and after an earthquake**
- **How to ensure that you and your family will be safe after the next quake.**
- **Campus emergency procedures and what is expected of students, faculty, and staff should an earthquake occur**
- **The role of the Emergency Operations Center that provides the framework for the University's response to an emergency.**

Please sign up through the Employee Training Center on the Campus Portal. Instructions can be found at:

Presenters:

David Bowman, Ph.D., Chair of the Department of Geological Sciences

Dr. Bowman is an Associate Professor and Chair of the Department of Geological Sciences at CSUF. He graduated in 1999 with a Ph.D. in Geological Sciences from the University of Southern California, after which he was a Research Fellow in the Institute of Earth Physics at the University of Paris. In addition to his current position at CSUF, Dr. Bowman serves on the Board of Directors of the Southern California Earthquake Center. His research specialty is earthquake physics and earthquake forecasting.

Justin Hendee, Emergency Preparedness Coordinator

Justin Hendee is a Sergeant for the University Police and is currently serving as the Emergency Preparedness Coordinator for Cal State Fullerton. He graduated from Long Beach State with a Master of Science in Emergency Services Administration. In addition to his current position at CSUF, Justin has served as a patrol officer, field training officer, community services coordinator and patrol sergeant. Additionally he has over 14 years of military service.
